It can cause cirrhosis, which means that normal liver fabric is replaced with scar tissue. The Sales Department of work on marketing, record sales. In the following example: there are three p\_variable.h main\_prog.c access\_pfile.c p\_variable.h files: it is an header file that must be included in other files à develop ". The advantage of the properties is that users can manipulate the object from a point of view of internal data using a single item appointed with data and functionalities defined in it. Photos courtesy: the good brigade/digitalvision/quety hepatitis images is a condition that causes inflammation of your liver. However, in most cases, treatments focus on proper hydration and nutrition. To make this business model, the work will be different departments involved such as the Procurement Department, the Production Department, the sales department, the financial department. The encapsulation also provides a safe code that can be better understood by an example provided in the lower section. Access modifiers are explicitly present in C ++ for E.G. Public, private, but they are not explicitly present in C. hepatitis B can be transmitted through sexual activities and exposure to infected blood. We can therefore use this piece of code by calling its request in the main program rather than writing the entire pile of complex lines. The advantages of the incepts in C Erapsulation hides the implementation of a program and therefore easy to read and modify in the future according to business needs. When this is performed, the function call is performed to the functions in which they are defined in other files C together with structures. Look at your article that appears on the main page of the Geeksforgegeeks and to help the other geeks pray Write comments if you find something wrong, or you want to share more information on the topic discussed above. Recommended items This is a guide for encapsulation in C. Hepatitis C can spread through unprotected sex, protected, This is a less common way to transmit it. You would be surprised to learn how incredibly few programmers are, who know how to actually implement 100% private encapsulation of custom types. If you received a blood transfusion before 1992, you should also be tested for hepatitis C if you are not previously. ADS1248\_Destroy (ADS); } Now the main code cannot access any of the members of the structure, all members are private à C
